Dear Sir,

Re: Garage and Kitchen extension

BRE/1141/73

In reply to your letter of the 15th May, 1974, my Main Drainage Section has reported to the Building Inspectors that there are no objections to the work proceeding on the proposed kitchen and garage extension. This was agreed after consideration of the depth and construction of the cast iron pipeline which should suffer no adverse effect from the building of the extension, if the Building Regulations are complied with.

Should in the unlikely event any damage occur to the pipeline then my Council will make all the necessary repairs to the pipeline, including any repairs and reinstatements required to your property, should access have been required.

Yours faithfully,

Engineer.

D.N. Barker. Esq.
