

Dear Planning Policy Team,

Received

Proposed development at W, Horndon

I disagree with the proposal of so many houses being built:-

- a) The Green Belt should remain Green Belt.
- b) The village would no longer be a village because the amount of new dwellings proposed would swamp it.
- c) The Flood risk is ever present with floods occurring in 1958, 1981 and 2012. Having suffered flood damage to my own property here, I would like to know if there has been sufficient assessment carried out of drainage in the area, if the village is to be tripled in size.

We are a small village with few amenities and an extremely poor bus service. I do not think our location is sustainable for your plans.

I do not object to a small development of new homes but not on Green Belt and only if the Flood risk has been properly assessed and implemented.

Yours faithfully
