Question 1: Which **Main Modification and/or supporting document** does your representation relate to?

Each Main Modification within the Schedule has a reference number. This can be found in the first column i.e. MM1, MM2

Any representations on a supporting document should clearly state which paragraphs of the document it relates to and, as far as possible, your comments should be linked to specific Main Modifications. You should avoid lengthy comments on the supporting documents themselves.

Representations on the Policies Map must be linked to specific modifications in that they reflect a change required as a result of a Main Modification.

I have an issue with flooding to my property already and although my area is recognised as a "Critical Drainage Area" the Inspectors have removed a comment that the development will impact surface water flooding - WHY?? With Global warming and more extreme weather predicted this situation will definitely worsen causing great concerns for my family, small children, ~~a~~ pets and of course my historical 16th Century cottage which has been underwater already on quite a few occasions - If areas are to be concreted over the excess water will have nowhere to go except into peoples Homes -

Why is the Environment Agency not been involved as part of the initial plan. They need to be consulted & their advice acted upon before any plans are considered or passed. This step has not been considered/taken - why is that?
